announce the

Greatest Value in Player-Pianos

at popular prices to be found anywhere.

Artistic Standards of the Aeolian Company Exemplified in

# The New Technola Piano Price, \$450.

Fidelity to the highest artistic ideals—an ability to give the greatest value at a minimum of cost—these are the fundamentals on which the Aeolian Company has built the largest music business in the world.

In this Company's latest achievement—The Technola Piano—these

fundamentals are represented in their fullest degree.

The Technola Piano is the first artistic player-piano ever put upon the market at a popular price. Four years were required to build the Technola Piano. The leading experts of nine famous factories have co-operated in its development. All the skill, the experience, and the craftsmanship of the world's greatest musical instrument specialists are embodied in this new instrument.

Lacking the Aeolian Company's almost unlimited facilities, the economies resulting from its enormous manufacturing operations, and its wonderful organization, no manufacturer could begin to produce such an

instrument as this and sell it at so low a price.

ica-they make the unequivocal statement-

#### A Statement from the Technola's Makers

The manufacturers of the Technola Piano are recognized throughout the entire world as the leading specialists in player-construction.

They are responsible for such renowned instruments as the Steinway, Weber, Steck, Wheelock, and Stuyvesant Pianola Pianos, the Aeolian Orchestrelle, and the superb Aeolian Pipe Organ. Based on their practical knowledge of the whole player industry-in Europe as well as in Amer-

That no player-piano at anywhere near the price of the Technola approaches it. And that no player-piano at any price (with the single exception of the Pianola Piano) surpasses the Technola.

The payment of \$20 places this superb instrument in your home. Monthly payments of \$12 are then charged on the balance. The cost of music for the Technola Piano is slight. A small sum annually gives access to the Aeolian Music Circulating Library-the largest

and most complete institution of its kind in existence. The Technola Piano is made in two styles-one at \$450 and another model, playing both 65 and 88 note music rolls, at \$525.
